

# Diesel Field Service

Quality service for quality engines

As the owner or operator of one of our diesel engines, you know how much the success of your business relies upon the quality of your engine's performance.

A world class diesel engine deserves world class support, and there is no better way to ensure your equipment's continued reliability and efficiency than by dealing with the original engine manufacturer.

Whether installing, commissioning, providing routine servicing, proactive or reactive maintenance, MAN Diesel & Turbo's highly skilled and experienced field service engineers are on call 24/7 to help you get the optimum performance from your engine.

Trained through our PrimeServ Academy network, each engineer is an expert on all of our supported engines and has the knowledge and skills to troubleshoot in any emergency or planned maintenance scenario on land or at sea.

Our service engineers are strategically located close to our customers. They can be mobilised within 24 hours to any part of the world, minimising travel time and ensuring a rapid response.

Once on-site, they can act in a supervisory capacity to local staff where required, and liaise closely with suppliers of associated equipment to ensure that complete installations are returned to service quickly and efficiently.

We also provide full warranty support together with scheduled servicing and routine maintenance, a prompt breakdown service and a variety of testing, installation, commissioning, modification and relocation services.

#### Key benefits:

- Cost effective through-life support for the complete range of MAN Diesel & Turbo engines
- Quality and reliability assured through genuine parts and OEM expertise
- Reduced downtime and lower running costs through more efficient operation
- Extended, more productive engine life
- Skilled engineers available worldwide
- On-site supervision of local staff to minimise costs
